BUILDINGS AND GROUNDS FOR INFORMATION ONLY:

NOVEMBER

Monthly fire drills are conducted in each educational building throughout the school district to ensure that students and staff evacuate the building in a safe and orderly manner. Act 55 requires that Pennsylvania School Districts conduct a more comprehensive, safety/lockdown drill within the first 90 days of the school year that can take the place of a regular fire drill. A safety drill prepares students and staff for situations involving a potential threat inside or near the school. During a lockdown drill, occupants secure classrooms, remain quiet, and follow safety protocols to protect against intruders or other dangers. In 2025-2026, the district implemented the ALICE program, which empowers staff to make informed decisions and take appropriate actions beyond traditional lockdown procedures. Both drills (typical and required lockdown) are essential components of the district's comprehensive safety and emergency preparedness program. Drills listed below include the district's compliance with the Act 55 requirements for several of our educational facilities:
