Motion to approve. This motion, made by Ken Keiser and seconded by Daniel Bell, Carried.

This subject was discussed in the informational portion of the June 2026 Facilities and Operations Meeting.
Recommend to seek Board approval at the September 17, 2026 Action Meeting, fo BP-2 MC Change Order #1 for the purchase of two 4MM BTU Condensing Boilers to replace the existing boiler at the HS. While boiler replacement was always part of the BP-3 portion of the project, premature failure of a majority of the tubes in Boiler #2 the Burnham Boiler, requires a significant investment of over $150,000.00, to extend the life a couple of years, until the replacement can take place. Since the boilers are being relocated from their current position, we can not just install the new boiler ahead of schedule in the project. The boilers being installed, once the new boiler pads are ready and the boilers installed, will be relocated/moved to two Elementary Schools, or possibly one Middle School for boiler replacement that are currently on the Capital Needs list. It should be noted that there will be a follow-up change order for the demolition and installation of the boilers forthcoming. These were not included as design drawings to adapt to the current piping have not been completed yet.

3.E. Professional services contract to CMTA for the design, bidding, construction and commissioning of the HVAC equipment at North Wales ES and York Ave ES.
Motion to Approve. This motion, made by Ken Keiser and seconded by Daniel Bell, Carried.
Daniel Bell: Yea, Ken Keiser: Yea, Juliane Ramic: Yea
Yea: 3, Nay: 0
As discussed at the June 2026 Facilities and Operations Committee, the HVAC Chiller plants and associated rooftop equipment are past their life expectancy and continuing to fail. Last summer repairs, were made to both schools and failures continue to occur. Parts for some equipment are increasingly difficult, or not possible to obtain. These items have been on the Capital Needs List and are now in need of replacement, to avoid continued wasted repair costs. Total project cost for both schools is estimated at $2,079,781.00 inclusive of this contract. The original proposal attached is for the chiller plant replacements only. Due to the submission to the PA Department of Economic Development for the Facilities Improvement Grant, the existing rooftop units were added to the project. The design and CM services will be required in either scenario.

Dear Bill,

We have attached our cost proposal for the work outlined in RFI EC 003 (attached). This work includes all related excavation, conduit, concrete encasement, backfill, wire, etc. for the work.

The proposal cost is based on the use of allowance items for the cost. If this is not the direction, we will adjust the proposal to incorporate the cost of additional bond.

This proposal is valid for 20 days from this date. If not accepted and agreed to by then we reserve our right to adjust associated costs due to the supplier increase and other items beyond our control.

Total additional cost ……. $28,203.00

If you have any questions, or if I can be of any assistance to you, please feel free to contact me at your convenience.

Very truly yours,

Re: North Wales ES, A.M. Kulp ES, Nash ES – Energy Saving Project
Prepared for: North Penn School District
Date: August 4, 2026

North Wales Elementary School, located at 201 Summit St, North Wales, PA 19454, was constructed in 1927. The most recent lighting upgrade project took place in 2009. The existing lighting system utilizes outdated technology resulting in high energy consumption and maintenance costs.

A.M Kulp Elementary School, located at 801 Cowpath Rd, Hatfield, PA 19440, was constructed in 1957. The most recent lighting upgrade project took place in 2009. The existing lighting system utilizes outdated technology resulting in high energy consumption and maintenance costs.

Nash Elementary School, located at 1560 Liberty Bell Dr, Harleysville, PA 19438, was constructed in 1976. The most recent lighting upgrade project took place in 2009. The existing lighting system utilizes outdated technology resulting in high energy consumption and maintenance costs.

Proposed Project – Scope of Work

North Wales ES Lighting Replacement Scope

Light fixtures at North Wales Elementary School primarily utilize fluorescent bulbs. As bulbs and fixtures fail, the School District retrofits with LED. This building also utilizes a legacy centralized Lutron lighting control system for which it is difficult to get replacement parts. The existing lighting lacks consistency throughout the building and is less energy-efficient than modern solutions.

The proposed replacement scope would include replacing all light fixtures throughout the building with high-efficiency LED fixtures. The legacy Lutron system would be removed. Lighting would be controlled through new wall switches and occupancy sensors as this is the District's preference for simplicity and ease of maintenance.

A.M. Kulp ES Lighting Replacement Scope

Light fixtures at A.M. Kulp Elementary School primarily utilize fluorescent bulbs. As bulbs and fixtures fail, the School District retrofits with LED. This building also utilizes an outdated centralized lighting control system. This lighting control system is currently being bypassed due to the difficulties it has caused for the maintenance staff. The existing lighting lacks consistency throughout the building and is less energy-efficient than modern solutions.

The proposed replacement scope would include replacing all light fixtures throughout the building with high-efficiency LED fixtures. The existing bypassed central lighting control system would be removed. Lighting would be controlled through new wall switches and occupancy sensors as this is the District's preference for simplicity and ease of maintenance.

Nash ES Lighting Replacement Scope
Light fixtures at Nash Elementary School primarily utilize fluorescent bulbs. As bulbs and fixtures fail, the School District retrofits with LED. This building also utilizes a legacy centralized Lutron lighting control system for which it is difficult to get replacement parts. The existing lighting lacks consistency throughout the building and is less energy-efficient than modern solutions.

Lighting would be controlled through new wall switches and occupancy sensors as this is the District's preference for simplicity and ease of maintenance.

Proposed Projects – Benefits

The proposed improvements directly address deficiencies identified during the overall building assessments. Completion of the project will:

1. Improve light levels throughout administrative and instructional spaces.
2. Reduce maintenance demands on District staff.
3. Reduce energy consumption by installing modern high-efficiency fixtures and controls.
4. Remove obsolete equipment that can no longer be effectively utilized by the District.
5. Reduce the risk of lighting system failures that could disrupt educational operations, extracurricular activities, and community use of the facilities.

17. The Parties hereto agree that upon approval of the Settlement Stipulation by the Court, Montgomery County, Montgomery County Community College and Upper Gwynedd Township shall issue tax bills to Former Owner and Current Owner for the respective underpayments of taxes for tax years 2025 and 2026 within sixty (60) days of the Court's approval of this Settlement Stipulation.
